## Teaching Mathematics in a Disconnected World

**Abstract:** In a world where information is always at our fingertips in seconds, it is surprising how different our educational systems are, and how little communication there is between mathematicians teaching in different parts of the world. This presentation will focus on my experiences as a Fulbright teaching awardee in Indonesia, what I learned, and what we can all do to advance education and collaboration in mathematics.

**Keywords:** Different educational system, teaching mathematics, collaborations, and Fulbright.

**Wednesday, Oct. 23, 1:05 – 1:50 pm in 4-2-314**
